

# NATURAL LIGHT PATIO COVERS

## LET IN THE LIGHT - NOT THE HEAT

Enjoy a sun-filled patio without the oppressive heat and harmful uv rays. Our high-performance acrylic panels allow beautiful natural light to pass through while reflecting heat and blocking UV rays. You get a comfortable, inviting space that looks bright, feels cool, and elevates your home's outdoor experience.

- **UV BLOCKING**

**NATURAL LIGHT PATIO COVERS** offer superior protection by blocking all UV, significantly reducing heat, and maintaining clarity and color for decades, supported by a strong warranty, making it a durable choice for patio covers and similar applications.

## ► UV PROTECTION & HEAT REDUCTION

**UV Blocking:** Blocks nearly 100% of UV light, protecting skin, furniture, and plants from damage.

**Heat Blocking:** The "HeatStop" feature uses IR reflection to block up to 75% of the sun's heat, keeping the area cooler than traditional materials.

**Light Transmission:** Cool Blue allows ample natural light while providing a pleasant, cool blue tint, unlike metal roofs that darken spaces.

## ► WARRANTY & DURABILITY

**30-Year Warranty:** Natural Light Patio Covers provide a 30-year non-discoloration guarantee, helping preserve their blue tone and appearance for decades.

**UV-Stable:** The acrylic is inherently UV-stable throughout the material, not just a surface coating, preventing yellowing and brittleness over time.
